

exhaust) created by the blower 10 can be used to both encourage the propagation of the fire and direct the fire towards the main wild fire. The ability to quickly spread the backfire in the proper direction is imperative because a sudden change in wind direction or other weather conditions could cause the backfire to become as big a problem as the original fire.

Remarks

The allowed claims remain in this case. Accordingly, this application is in condition for allowance.

Respectfully submitted,

PHILIP FURGANG
